

APPENDIX TO
The Calcutta Gazette.

WEDNESDAY, JULY 7, 1909.

NOTICES TO MARINERS.

THE following Notices are published for general information.

CALCUTTA, the 3rd July 1909.

T. BUTLER,
Secy. to the Govt. of Bengal.

AUSTRALIA AND TASMANIA.

Caution when approaching Australian ports.

No. 263 (first publication).—The President of the Marine Board, Port Adelaide, has given Notice (No. 11 of 1909), that in connection with periodical exercises or manoeuvres, or in the event of relations becoming strained between Great Britain and any naval power, an Examination Service may come into force at the ports or localities mentioned at the end of this notice.

Masters are warned that before attempting to enter any of these ports they must, in their own interests, strictly obey all instructions given to them by the vessels which will be charged with the duty of examining ships desiring to enter the ports, and allotting positions in which the ships shall anchor. In case of fog they should on no account attempt to enter before receiving permission from the Examination Officer.

The institution of an Examination Service at any port will never be publicly advertised, but at all times when the relations of Great Britain with foreign powers are known to be in a state of tension, especial care should be taken in approaching the ports, by day or by night, to keep a sharp lookout for the Examination Steamer, and to be ready to "bring to" at once when hailed by her or warned by the firing of a gun.

If the entrance to a port is closed, three Red Vertical Lights by night or three Red Balls by day will be exhibited in some conspicuous position in or near to its approach, and as far as possible notice of this fact will be given by lookout vessels in the offing.

If the Examination Service is in force, the Examination Steamer will be distinguished at night—

- (a) When the port is closed, by three Red Vertical Lights;
- (b) When the port is open, by three White Vertical Lights.

The Pilots attached to the ports will be acquainted with the regulations to be followed.

AUSTRALIA AND TASMANIA.

Caution when approaching Australian ports.

No. 263 (second publication).—The President of the Marine Board, Port Adelaide, has given Notice (No. 11 of 1909), that in connection with periodical exercises or manoeuvres, or in the event of relations becoming strained between Great Britain and any naval power, an Examination Service may come into force at the ports or localities mentioned at the end of this notice.

Masters are warned that before attempting to enter any of these ports they must, in their own interests, strictly obey all instructions given to them by the vessels which will be charged with the duty of examining ships desiring to enter the ports, and allotting positions in which the ships shall anchor. In case of fog they should on no account attempt to enter before receiving permission from the Examination Officer.

The institution of an Examination Service at any port will never be publicly advertised, but at all times when the relations of Great Britain with foreign powers are known to be in a state of tension, especial care should be taken in approaching the ports, by day or by night, to keep a sharp lookout for the Examination Steamer, and to be ready to "bring to" at once when hailed by her or warned by the firing of a gun.

If the entrance to a port is closed, three Red Vertical Lights by night or three Red Balls by day will be exhibited in some conspicuous position in or near to its approach, and as far as possible notice of this fact will be given by lookout vessels in the offing.

If the Examination Service is in force, the Examination Steamer will be distinguished at night—

(a) When the port is closed, by three Red Vertical Lights;

(b) When the port is open, by three White Vertical Lights.

The Pilots attached to the ports will be acquainted with the regulations to be followed.

AUSTRALIA AND TASMANIA.

Caution when approaching Australian ports.

No. 263 (*third publication*).—The President of the Marine Board, Port Adelaide, has given Notice (No. 11 of 1909), that in connection with periodical exercises or manœuvres, or in the event of relations becoming strained between Great Britain and any naval power, an Examination Service may come into force at the ports or localities mentioned at the end of this notice.

Masters are warned that before attempting to enter any of these ports they must, in their own interests, strictly obey all instructions given to them by the vessels which will be charged with the duty of examining ships desiring to enter the ports, and allotting positions in which the ships shall anchor. In case of fog they should on no account attempt to enter before receiving permission from the Examination Officer.

The institution of an Examination Service at any port will never be publicly advertised, but at all times when the relations of Great Britain with foreign powers are known to be in a state of tension, especial care should be taken in approaching the ports, by day or by night, to keep a sharp lookout for the Examination Steamer, and to be ready to "bring to" at once when hailed by her or warned by the firing of a gun.

If the entrance to a port is closed, three Red Vertical Lights by night or three Red Balls by day will be exhibited in some conspicuous position in or near to its approach, and as far as possible notice of this fact will be given by lookout vessels in the offing.

If the Examination Service is in force, the Examination Steamer will be distinguished at night—

(a) When the port is closed, by three Red Vertical Lights;

(b) When the port is open, by three White Vertical Lights.

The Pilots attached to the ports will be acquainted with the regulations to be followed.

HENRY T. HYDE,

The 30th June 1909.

Administrator-General of Bengal.

3. Buoys established:

- (a) *Position*.—Moored on the southern side of the channel, with Limit beacon bearing S. 24° W., distant 1½ cables.
- (b) *Position*.—Moored on the southern side of the channel, with Limit beacon bearing N. 78° W., distant 4½ cables.
- (c) *Position*.—Moored on the southern side of the channel, with Limit beacon bearing N. 77° W., distant 13½ cables.

Description.—The above buoys are conical buoys, painted red, and numbered Nos. 1, 2, and 3, respectively.

4. Directions:

Vessels inward bound should, after having passed the Wusung inner bar signal station, keep 1½ cables from the embankment on the left bank of the river and pass No. 1 buoy, moored off Limit beacon, on the starboard hand and at a distance of half a cable; continuing up river, pass No. 2 buoy on the same hand and at the same distance. When abreast No. 2 buoy, follow up the line of leading marks until abreast No. 3 buoy, where divert from the line and keep about half a cable from the Conservancy works on Gough island until having passed the upper end of such works, which is marked by a pile beacon, surmounted by a ball, painted black.

The difference between the depth of water in the Astraea channel and that on the Wusung inner bar, as indicated by the signals at the inner bar signal station, will be shown at the Wusung lighthouse and from the higher of the two leading marks on Gough island, as under:

Difference, in feet.	Symbols.
1	▼
2	●
3	◆
4	■
5	▲
6	⋈

When the depth of water in the Astraea channel is more than on the Wusung inner bar, symbols as above will be shown on the southern yard-arm, and when less, on the northern yard-arm; if the depth be the same as on the Wusung inner bar, no symbols will be shown.

In order to avoid accidents, vessels intending to pass through the Astraea channel must hoist a black ball at the fore truck when abreast the Wusung lighthouse on vessels inward bound, and when abreast Black point, or as soon as the signals at the Wusung inner bar signal station can be seen, on board vessels outward bound.

Caution.—Mariners are cautioned that they must go dead slow when passing the barges engaged in dropping "zinkstuka" in the Ship channel and when passing any other Conservancy works in course of construction.

When dredgers are at work in the Astraea channel, steam vessels should, when approaching them, sound their whistles and slow down, to give the dredgers time to slacken their moorings.

Variation.—3° W.

*Astraea (Junk) channel—Beacons and buoys established—Directions.**No. 367 (second publication).*—The following particulars, etc., relative to the above, issued by the British Admiralty (No. 1228 of 1909), are republished:—*Subject.*—Astraea channel southward of Gough island, formerly known as Junk channel, is open during daylight to vessels wishing to use it. The undermentioned beacons and buoys have been established, and the directions given below should be followed:—*Position.*—High Bar mark, lat. $31^{\circ} 21\frac{1}{2}'$ N., long. $121^{\circ} 31\frac{1}{2}'$ E.

1. Beacon established:

(a) *Position.*—Situated at the end of the works at the south-eastern end of Gough island with High Bar mark bearing N. 39° W., distant $18\frac{1}{2}$ cables.*Description.*—Pile beacon, surmounted by a ball, painted black.

2. Leading beacons established:

(a) Front beacon—

Position.—Situated at the south-eastern end of Gough island, with High Bar mark bearing N. 37° W., distant $14\frac{1}{4}$ cables.*Description.*—Pole beacon, surmounted by a triangle, point upwards, painted black.

(b) Rear beacon—

Position.—Situated at a distance of $\frac{9}{16}$ cables, S. 81° E., from front beacon.*Description.*—Pole beacon, surmounted by a triangle, point downwards, painted black.*Remarks.*—These two beacons in line, S. 81° E., indicate the centre of the Astraea channel.

3. Buoys established:

- (a) *Position*.—Moored on the southern side of the channel, with Limit beacon bearing S. 24° W., distant $1\frac{1}{2}$ cables.
 (b) *Position*.—Moored on the southern side of the channel, with Limit beacon bearing N. 73° W., distant $4\frac{1}{2}$ cables.
 (c) *Position*.—Moored on the southern side of the channel, with Limit beacon bearing N. 77° W., distant $13\frac{1}{2}$ cables.

Description.—The above buoys are conical buoys, painted red, and numbered Nos. 1, 2, and 3, respectively.

4. Directions:

Vessels inward bound should, after having passed the Wusung inner bar signal station, keep $1\frac{1}{2}$ cables from the embankment on the left bank of the river and pass No. 1 buoy, moored off Limit beacon, on the starboard hand and at a distance of half a cable; continuing up river, pass No. 2 buoy on the same hand and at the same distance. When abreast No. 2 buoy, follow up the line of leading marks until abreast No. 3 buoy, where divert from the line and keep about half a cable from the Conservancy works on Gough island until having passed the upper end of such works, which is marked by a pile beacon, surmounted by a ball, painted black.

The difference between the depth of water in the Astraea channel and that on the Wusung inner bar, as indicated by the signals at the inner bar signal station, will be shown at the Wusung lighthouse and from the higher of the two leading marks on Gough island, as under:

Difference, in feet.	Symbols.
1	
2	
3	
4	
5	
6	

When the depth of water in the Astraea channel is more than on the Wusung inner bar, symbols as above will be shown on the southern yard-arm, and when less, on the northern yard-arm; if the depth be the same as on the Wusung inner bar, no symbols will be shown.

In order to avoid accidents, vessels intending to pass through the Astraea channel must hoist a black ball at the fore truck when abreast the Wusung lighthouse on vessels inward bound, and when abreast Black point, or as soon as the signals at the Wusung inner bar signal station can be seen, on board vessels outward bound.

Caution.—Mariners are cautioned that they must go dead slow when passing the barges engaged in dropping "sinkstuka" in the Ship channel and when passing any other Conservancy works in course of construction.

When dredgers are at work in the Astraea channel, steam vessels should, when approaching them, sound their whistles and slow down, to give the dredgers time to slacken their moorings.

Astraea (Junk) channel—Beacons and buoys established—Directions.

No. 367 (third publication).—The following particulars, etc., relative to the above, issued by the British Admiralty (No. 1228 of 1909), are republished:—

Subject.—Astraea channel southward of Gough island, formerly known as Junk channel, is open during daylight to vessels wishing to use it. The undermentioned beacons and buoys have been established, and the directions given below should be followed:—

Position.—High Bar mark, lat. 31° 21½' N., long. 121° 31½' E.

1. Beacon established:

(a) *Position.*—Situated at the end of the works at the south-eastern end of Gough island with High Bar mark bearing N. 39° W., distant 18½ cables.

Description.—Pile beacon, surmounted by a ball, painted black.

2. Leading beacons established:

(a) Front beacon—

Position.—Situated at the south-eastern end of Gough island, with High Bar mark bearing N. 37° W., distant 14½ cables.

Description.—Pole beacon, surmounted by a triangle, point upwards, painted black.

(b) Rear beacon—

Position.—Situated at a distance of 10 cables, S. 81° E., from front beacon.

Description.—Pole beacon, surmounted by a triangle, point downwards, painted black.

Remarks.—These two beacons in line, S. 81° E., indicate the centre of the Astraea channel.

8. Buoys established:

- (a) *Position*.—Moored on the southern side of the channel, with Limit beacon bearing S. 24° W., distant $1\frac{1}{2}$ cables.
- (b) *Position*.—Moored on the southern side of the channel, with Limit beacon bearing N. 73° W., distant $4\frac{1}{2}$ cables.
- (c) *Position*.—Moored on the southern side of the channel, with Limit beacon bearing N. 77° W., distant $13\frac{1}{2}$ cables.

Description.—The above buoys are conical buoys, painted red, and numbered Nos. 1, 2, and 3, respectively.

4. Directions:

Vessels inward bound should, after having passed the Wusung inner bar signal station, keep $1\frac{1}{2}$ cables from the embankment on the left bank of the river and pass No. 1 buoy, moored off Limit beacon, on the starboard hand and at a distance of half a cable; continuing up river, pass No. 2 buoy on the same hand and at the same distance. When abreast No. 2 buoy, follow up the line of leading marks until abreast No. 3 buoy, where divert from the line and keep about half a cable from the Conservancy works on Gough island until having passed the upper end of such works, which is marked by a pile beacon, surmounted by a ball, painted black.

The difference between the depth of water in the Astraea channel and that on the Wusung inner bar, as indicated by the signals at the inner bar signal station, will be shown at the Wusung lighthouse and from the higher of the two leading marks on Gough island, as under:

Difference, in feet.	Symbols.
1	
2	
3	
4	
5	
6	

When the depth of water in the Astraea channel is more than on the Wusung inner bar, symbols as above will be shown on the southern yard-arm, and when less, on the northern yard-arm; if the depth be the same as on the Wusung inner bar, no symbols will be shown.

In order to avoid accidents, vessels intending to pass through the Astraea channel must hoist a black ball at the fore truck when abreast the Wusung lighthouse on vessels inward bound, and when abreast Black point, or as soon as the signals at the Wusung inner bar signal station can be seen, on board vessels outward bound.

Caution.—Mariners are cautioned that they must go dead slow when passing the barges engaged in dropping "sinkstake" in the Ship channel and when passing any other Conservancy works in course of construction.

When dredgers are at work in the Astraea channel, steam vessels should, when approaching them, sound their whistles and slow down, to give the dredgers time to slacken their moorings.

AUSTRALIA, EAST COAST.

South Channel, Wide Bay Bar—Depth of water; Beacon erected.

No. 535 (first publication).—The Portmaster, Brisbane, has given Notice (No. 6 of 1909) that this channel now carries a minimum depth of 14 feet 6 inches at L.W.O.S.T., and its use by vessels of light draft is recommended in preference to the North Channel, owing to the fact that a vessel would carry the sea behind her, whereas in the North Channel the sea is on the broadside.

To facilitate the navigation of this Channel a triangular beacon has been erected, which is to be kept in line with the back square beacon on Hook Point bearing N. 89° W. until Inskip Point lead comes in line, when proceed as usual.

By following these directions a depth of 14 feet 6 inches at L.W.O.S.T. will be obtained.

Charts affected, Nos. 1030 and 1068; Australia Directory, vol. ii.

AUSTRALIA, SOUTH—GULF OF ST. VINCENT.

Will Creek (Port Price)—Beacon erected.

No. 536 (first publication).—The President of the Marine Board, Port Adelaide, has given Notice (No. 20 of 1909) that a pile beacon, painted black, with square head, has been placed in 4 ft. at L.W.S. to mark the south side of the entrance to Will Creek. The entrance marked by this beacon is about $1\frac{1}{2}$ miles S.S.E. of the entrance marked on the Admiralty charts.
